### **DETAILED ACTION**

1. It is hereby acknowledged that the following papers have been received and placed of record in the file: Amendment A dated May 5, 2004.
2. Claims 1-34 are presented for examination.

### ***Response to Arguments***

3. Applicant's arguments, see page 11, filed May 5, 2004, with respect to the Specification have been fully considered and are persuasive. The objection of the missing Summary of Invention in the Specification has been withdrawn.
4. Applicant's arguments, see pages 14-16, filed May 5, 2004, with respect to the claim rejections have been fully considered. In light of the clarification of the claims through Applicant's arguments, the following restrictions are required.

### ***Election/Restrictions***

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, 13-20, and 25-30, drawn to configuring a mode word to perform the detection of an inserted medium and executing a program on the medium, classified in class 713, subclass 1.
  - II. Claims 9-12, 21-24, and 31-34, drawn to the detection of an inserted medium and executing a program on the medium, classified in class 710, subclass 15.

The inventions are distinct, each from the other because of the following reasons:

6. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as polling the drive

Art Unit: 2116

when configured in a particular mode, whereas invention II services the drive based mainly on an interrupt. See MPEP § 806.05(d).

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
